CORE ANTERIOR & CORE POSTERIOR

4-DAY CERTIFICATION COURSE

Dr. David Clark and Dr. Rafael Bustamante

MAY 12–15, 2027 | TORONTO, ON | $8,500 USD* | 36 CE CREDITS

COURSE DESCRIPTION

Bioclear's Core Anterior / Posterior combined course builds a strong foundation in the Bioclear Method. Doctors will learn the Five Pillars of the Bioclear Method, which are essential for long-lasting, minimally invasive, and predictable Bioclear restorations. Doctors gain confidence as they collaboratively practice all applications of the Bioclear Method during intensive hands-on exercises using lifelike soft tissue models that simulate posterior and anterior restorations.

**Cancellations made within the 45 days before the course start date are not eligible for a full refund.*

ANTERIOR

The focus of the anterior portion of this course will be on adult dentitions as an alternative procedure to porcelain crowns and porcelain veneers.

LEARNING OBJECTIVES

- Know and understand the 5 Pillars of the Bioclear Method
- Learn to injection mold and treat black triangles and peg laterals
- Understand and complete the reconstruction of a maxillary sextant
- Add sufficient volume to brighten the tooth shade
- Reconstruct fractured incisors and treat rotated teeth with "instant ortho"
- Maximize enamel adhesion, minimize dentin adhesion
- Tissue recessions: adding the root overlay to cover cervical abrasions, recession, dark roots, and more
- Smile design, tooth form, and arch form: what to look for and how to plan your procedures to achieve a pleasing appearance
- The Golden Rule of proportion

POSTERIOR

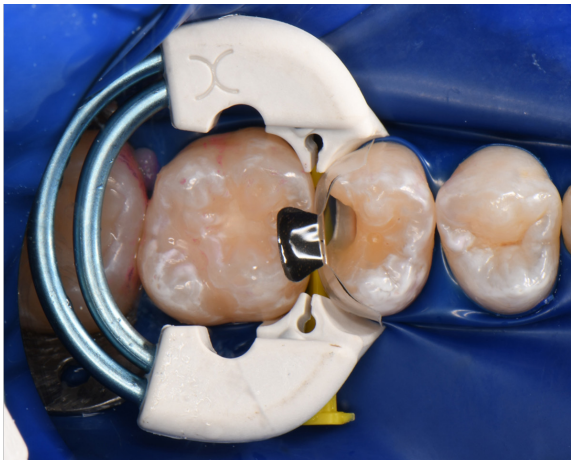

The posterior portion of this course introduces Bioclear Class II and “Calla Lily” cavity preparation designs, as well as engineering principles used in the design of new non-retentive compression-based preparations.

LEARNING OBJECTIVES

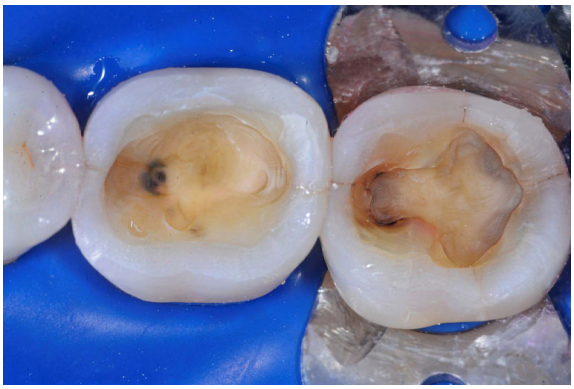

- Know and understand the 5 Pillars of the Bioclear Method
- Learn to perform “Calla Lily” preparations, Bioclear posterior overlays, and selective caries removal
- Know the seven keys to world-class contacts
- Know what deep margin acquisition is and how to manage it
- Learn to replace old alloys and update preparations using engineering principles for new non-retentive compression-based preparations, rather than outdated GV Black tension-based preparations
- Understand how to treat split and cracked teeth
- Learn how to perform a quadrant strategy restoration using the Bioclear Method

“Going through this anterior course and learning the engineering behind Bioclear and the recipe [Bioclear Method], I can go back to my patients and be more confident in what I’m providing them. The recipe gives a clear and easy-to-follow understanding of what Bioclear can do for my patients.”
